Velikhanov Teymur
Backend Developer

PROFILE

I'm a 25-year-old web developer with three years of commercial experience in programming. While my journey began with PHP (Laravel), I've since shifted my focus to Python (Django, DRF) and Golang. I specialize in building robust backend systems and RESTful APIs. Proficient in database management with MySQL, PostgreSQL, MongoDB, and Redis, I also bring a solid foundation in PHP Laravel to the table. While I primarily focus on backend development, I'm capable of working with design tools like Photoshop and Figma when necessary.

WORK EXPERIENCE

MigrationPro - Python Developer
June 2022 - Present

- Implementing REST API endpoints
- Using e-commerce API to import/export data
